7:30 -
8:00

Registration

Pre-Conference Workshops

8:00 -
12:00

Open Source GIS

CH2M HILL will discuss and demonstrate how to intergrate your existing GIS system with some of the new open source technology, like Google Earth, Map Server, etc....

Presented by: Jubal Harpster, CH2M HILL

Working with ArcGIS Geoprocessing, ModelBuilder and Scripting

Introduced at ArcGIS 9.0, the geoprocessing framework provides new ways to streamline data processing, conversion, and analysis. Key features that will be discussed include ModelBuilder, for "visually programming" your work flows, and how to enhance those models by incorporating scripting languages like Python, VBScript or JavaScript.

Presented by: ESRI

12:00 -
1:00

Lunch Break

1:00 -
5:00

Evolution or Intelligent Design (C#.NET, ArcGIS Server, Web Services)

Integral GIS will share with us their experience and thoughts on developing applications with C#.NET. The presentation will also cover the ArcGIS Server development experience. Throughout the presentation, Integral GIS will demo Object Oriented Principles to stream line common GIS functionality.

Presented by: Joe Wong, Integral GIS

Data Interoperability

Presented by: Safe Software
